SUPERSEDING INDICTMENT

David J. Bradley, Clerk of Court

The Grand Jury charges:

General Allegations

At all times material to this Superseding Indictment, unless otherwise specified:

1. The Medicare Program ("Medicare") was a federal healthcare program providing benefits to individuals who were over the age of 65 or disabled. Medicare was administered by the Centers for Medicare and Medicaid Services ("CMS"), a federal agency under the United States Department of Health and Human Services. Medicare was a "healthcare benefit program" as defined by Title 18, United States Code, Section 24(b).

2. Medicare was subdivided into multiple Parts. Medicare Part B covered physicians' services and partial hospitalization programs ("PHPs") connected with the treatment of mental illness. The treatment program of PHPs closely resembled that of a highly structured hospital inpatient program, but it was a distinct and organized intensive treatment program that offered less than 24-hour daily care.

3. Patients eligible for Medicare coverage of a PHP comprised two groups: (1) those patients who were discharged from an inpatient hospital treatment program, and the PHP

was in lieu of continued inpatient treatment and (2) those patients who, in the absence of partial hospitalization, would require inpatient hospitalization.

4. Medicare guidelines required that patients admitted to a PHP required PHP services at levels of intensity and frequency comparable to patients in an inpatient setting for similar psychiatric illnesses.

5. Medicare guidelines required that patients admitted to a PHP be under the care of a physician who was knowledgeable about the patient and certified the patient's need for partial hospitalization.

6. Medicare guidelines required that upon admission, a physician certify that the patient admitted to the PHP would require inpatient psychiatric hospitalization if the partial hospitalization services were not provided, that the services were furnished while the individual was under the care of a physician, and that the services were furnished under an individualized written plan of care.

7. Under the PHP benefit, Medicare covered the following services: (1) individual and group psychotherapy with physicians, psychologists or other mental health professionals; (2) occupational therapy requiring the skills of a qualified occupational therapist; (3) services of social workers, trained psychiatric nurses and other staff trained to work with psychiatric patients; (4) drugs and biologicals furnished for therapeutic purposes that could not be self-administered; (5) individualized activity therapies that were not primarily recreational or diversionary; (6) family counseling services for which the primary purpose was the treatment of the patient's condition; (7) patient education programs where the educational activities were closely related to the care and treatment of the patient; and (8) diagnostic services.

8. Medicare guidelines specifically excluded meals and transportation from coverage under the PHP benefit.

9. Medicare did not cover programs providing primarily social, recreational or diversionary activities. Medicare excluded from coverage programs attempting to maintain psychiatric wellness and treatment of chronic conditions without acute exacerbation. Psychosocial programs that provided only a structured environment, socialization or vocational rehabilitation were not covered by Medicare.

10. Medicare required that the PHP was provided at a facility that was hospital based or hospital affiliated or at a community mental health center.

11. Individuals who qualified for Medicare benefits were commonly referred to as Medicare “beneficiaries.” Each beneficiary was given a Medicare identification number.

12. Hospitals, physicians and other healthcare providers that provided services to Medicare beneficiaries were referred to as Medicare “providers.” To participate in Medicare, providers were required to submit an application in which the providers agreed to comply with all Medicare related laws and regulations. If Medicare approved a provider’s application, Medicare assigned the provider a Medicare “provider number.” A healthcare provider with a Medicare provider number could file claims with Medicare to obtain reimbursement for services rendered to beneficiaries.

13. Medicare paid physicians, hospitals and other healthcare providers for services rendered to beneficiaries. To receive payment from Medicare, providers submitted or caused the submission of claims to Medicare, either directly or through a billing company.

14. CMS contracted with Medicare Administrative Contractors (“MACs”) to process claims for payment. The MAC that processed and paid Medicare Part B claims for physician and PHP services in Texas was TrailBlazer Health Enterprises, LLC (“TrailBlazer”).

15. To bill Medicare for services rendered, a provider submitted a claim form (Form 1500) to TrailBlazer. When a claim form was submitted, usually in electronic form, the provider certified that: (1) the contents of the form were true, correct and complete; (2) the form was prepared in compliance with the laws and regulations governing Medicare; and (3) the contents of the claim were medically necessary.

16. A Medicare claim for a physician service or PHP treatment was required to set forth, among other things, the beneficiary’s name and unique Medicare identification number, the service provided to the beneficiary, the date the service was provided, the cost of the service, and the name and unique physician identification number of the physician who prescribed or ordered the service.

17. A Houston hospital (“the Hospital”) was a Texas non-profit entity doing business in and around Houston and Dallas, Texas. The Hospital billed Medicare for inpatient psychiatric services purportedly provided at its main Houston location. The Hospital also billed Medicare for PHP services purportedly provided at locations in and around Houston and Dallas.

18. Defendant **SHARON IGLEHART, MD**, a resident of Harris County, Texas, was a Medical Doctor who acted as the attending physician at the Hospital’s psychiatric inpatient facility and PHPs and who submitted claims to Medicare for purportedly providing psychiatric treatment to Medicare beneficiaries.

25. **SHARON IGLEHART, MD** would authorize the Hospital to bill Medicare listing her as an attending physician to make the fraudulent claims appear legitimate.
